UltimateRecovery.com is no longer in business. I would suggest doing a Google search for similar services.

Page 132 Text Tool (T) Justify Text

Probably the easiest way to justify text in Photoshop Elements is to:

1. Activate the Text Tool (T) and drag out a text box
2. Type your text
3. Press Ctrl>Shift>J before you click on the ✓.
4. If you already committed your text and used a text box you can highlight the text and then Ctrl>Shift>J to justify the text.

MomsCorner4kids.com/fonts is no longer in business. If anyone knows if they moved to another site please let me know I loved this site!

Page 356 Installing Actions, Layer Styles, Brushes, Patterns, Textures and Custom Shapes

I've discovered a great inexpensive program that allows you to drag and drop your actions, layer styles, custom shapes and instantly install them. Two programs are available, one for Photoshop Elements 5, and one for Photoshop Elements 6 & 7 (in the same program). Below are the directions for using the Photoshop Elements 6 & 7 program, the version for Photoshop Elements 5 is essentially the same. I wish I would have found this a long time ago!

To purchase the program go to www.graficalicus.com and purchase the Add-O-Matic.
Download the file.

Unzip the folder.
Click on the icon and click run.
Close Photoshop Elements.

Click and drag
your actions, layer
styles, etc to the
gray box.

Click on the big red Go button. Choose Photoshop Elements 6 or 7. You will get a message saying your items have been added. You can launch Photoshop Elements by clicking where it says "Quit and Launch Elements 6 or 7". It's that easy!
